This District has received an application for a Department of the Army permit pursuant to Section 10 of the Rivers and Harbors Act of 1899 (33 U.S.C. 403).

The purpose of this notice is to solicit comments and recommendations from the public concerning issuance of a Department of the Army permit for the work described below.

**APPLICANT:** Angler's Club of Absecon Island  
Attn: Mr. Jeff Rutizer, President  
121 S. Exeter Avenue  
Margate City, New Jersey 08402

**WATERWAY:** Atlantic Ocean

**LOCATION:** 121 S. Exeter Avenue, Margate City, New Jersey at Atlantic Ocean

**ACTIVITY:** Extend the existing Margate fishing pier at Exeter Avenue by 300.0-linear feet seaward into the Atlantic Ocean via construction of one (1) 276.0-foot long by 15.0-foot wide timber pier segment with one (1) 60.0-foot long by 24.0-foot wide timber pier segment in "T" orientation at the seaward end. Construction of the pier extension would involve installation, via impact hammer, of a total of twenty-five (25) 12.0-inch diameter and eighty-seven (87) 14.0-inch diameter timber support piles. All construction equipment and materials would be staged on the Exeter Avenue beach. The proposed regulated work is planned for Fall 2019.

**PURPOSE:** Restore access to appropriate water depths for recreational fishing.

The decision whether to issue a permit will be based on an evaluation of the activity's probable impact including its cumulative impacts on the public interest. The decision will reflect the national concern for both protection and utilization of important resources. The benefits which reasonably may be expected to accrue from the work must be balanced against its reasonably foreseeable detriments. All factors which may be relevant to the work will be considered including the cumulative effects thereof; among those are conservation, economics, aesthetics, general environmental concerns, wetlands, cultural values, fish and wildlife values, flood hazards, flood plain values, land use, navigation, shore erosion and accretion, recreation, water supply and conservation, water quality, energy needs, safety, food and fiber production, mineral needs and
